EXPERIENCE

Grupo Indigo - México | Full Stack Developer

Jun. 2023 - Present

At Grupo indigo, I am part of a dynamic team that specializes in developing mobile applications. Our focus areas include E-Commerce and the creation of custom mobile applications.

- Proposed project ideas and suggested valuable improvements that have enhanced application performance.
- Designed and implemented applications for businesses, with features for control and user management.

OSC Compliance - Remote | Full Stack Developer

Oct. 2022 - March. 2023

- Worked implementing data structuring patterns to enhance data organization, retrieval, and manipulation, optimizing system performance.
- Designed and complemented Business management applications that improved workflow efficiency and data management for clients.

PROJECTS

Huble App - Full Stack Developer

My core contributions were front-end design, API development and integration, database modifications, and the final app-release process for publication on the Google Play Store.

EDUCATION

Universidad Politécnica de Pachuca - Software Engineer

Sep 2019 - Aug 2022

- Made a mobile app for clothes donations for people with limited resources
- Completed a Google Cloud Computing Foundations.

IPN CECyT 16 - Technician in automated systems

Aug 2016 - Jun 2019

- I developed a keen eye for detail, precision in execution, and an innovative approach to tackling challenges within the realm of automated technology
